

## ABOUT ME

Fullstack developer with experience in web application development and notions of mobile development. During my professional career, I have had the opportunity to work in a startup as a main web developer, carrying out various innovative projects related to 3D among others. This experience has been fundamental for my professional growth.

I am characterized by my dedication, attention to detail and my innate curiosity. I approach tasks with enthusiasm and a decisive attitude, always looking for opportunities to constantly improve. I enjoy working in a positive and collaborative environment. My passion for development is also reflected in my free time as I continue to expand my knowledge through courses and personal projects.
