

ABOUT ME

Technology professional with experience as a Fullstack developer, having led web development in a startup. I have participated in innovative projects related to 3D among others. This stage has allowed me to take on key technical responsibilities and grow professionally in agile and constantly changing environments.

I consider myself a problem-solving, detail-oriented person with a great capacity for autonomous learning. I am currently looking to redirect my career towards data analysis, contributing not only my technical profile, but also my commitment to continuous improvement and a job well done.

PROFESSIONAL EXPERIENCE

BEXREAL

Feb 2023 - Present

Fullstack developer

- Development and implementation of web solutions.
- Configure and manage cloud infrastructure on AWS (S3, Elastic Beanstalk, CloudFront, Route 53).
- Design of RESTful APIs with JWT authentication.
- Scripting for Automated Data Loading and Insertion (ETL) in MongoDB.
